

Covid-19

Covid-19 safety for clients and stylists is a number one priority at Not Your Average Bella. We perform safe and sanitary measures for our on-site services for weddings and events. NYAB follows a “3 S” guideline: sanitation, safety gear and social distancing.

Stylists/artists will take your temperature upon arrival with a contactless thermometer. If anyone has a temperature is higher than 99.9 F°, NYAB has the right to refuse any services for the safety of our team and clients. Stylists/artists will also have their temperature checked before arrival.

Clients are required to wear a face mask at all times, except while receiving makeup services.

Our team is required to wear face masks at all times and will arrive with fully sanitized hair and makeup kits. We will also bring cleaning disinfectants to sanitize our work areas.

Our team will wash hands and sanitize tools, equipment, and work area in between each client.

All clients are required to wash their hands directly before receiving a service.

Due to the high-risk factor with applying lip color, all clients who are receiving makeup services are required at this time to bring their own lipstick and lipliner (if you would like to use it). The artist will guide them on how to apply and then they will have their lip color to touch up throughout the night.

A new brush set will be used with each client. Our team brings a minimum of 10 brush sets to each wedding/event.

We require social distancing between bridal party members. If a stylist or artist is with a client please remain 6 feet away at all times.

At this time, we unfortunately cannot allow any additional friends/family to be at the bridal's trial for the safety of our stylist/artist and bride. However, our team is happy to take photos and videos to be able to capture your final look!

ALL NYAB STYLISTS AND ARTISTS ARE BARBICIDE COVID-19 CERTIFIED
